Portable NoteTab Light is a small program that offers a simple solution to taking notes and editing HTML codes through the same interface. The app has a simple interface that should be easy to figure out, thanks to the intuitive layout. As mentioned, Portable NoteTab Light is an app that makes text editing an easy task. You may work on several notes at the same time, since they can be opened in separate tabs. The text can be formatted in multiple ways, depending on what you desire, since the tools put at your disposal cover most of everything you can dream of. For instance, if you need to cut and paste areas from a pile of files, you may set up a Paste Board file and save text clips automatically. Also, you may strip all the HTML tags from files, thus leaving behind only the text in its pure form. The app provides a search tool that is quite thorough and even comes with an option to replace the discovered areas. There are also several formatting options, which enable you to modify the size of the font, to toggle word wrap and even to change the font name, size and style. It's also possible to set up text macros that can be filled in automatically by pressing certain shortcuts. Some macro libraries are supplied, but additional ones can be built personally. Since the app is completely portable, it doesn't need to be installed to the computer to function and can be launched from removable devices, such as flash drives. All in all, Portable NoteTab Light is a nice tool that has a wide range of features which can be quite useful. Less experienced individual should be able to figure out at least a part of what the app has to offer since some of its features are dedicated to more advanced users.
